

Abdelfettah MOSTAKIR

Software Engineer

Backend-oriented engineer, I design and develop robust systems using Java and Python, based on microservices architectures. I integrate DevOps practices (CI/CD, cloud, Kubernetes) to ensure reliable and scalable deployments, while also developing AI solutions (RAG, orchestration) with strong business value.

SKILLS

TECHNICALS:

- **Backend** : Java , Spring Boot & Microservices, Python, FastAPI
- **Frontend** : Angular, React.js, Tailwind
- **Bases de Données** : PostgreSQL, MySQL, MongoDB, Redis
- **DevOps & Cloud** : AWS, Terraform, Kubernetes, Jenkins
- **CI/CD & Gestion de Code** : Git, GitHub, GitLab
- **Tests & Performance** : JUnit, Mockito, Postman, JMeter
- **Systèmes & Automatisation**: Bash-Agentic-Workflow
- **Artificial intelligence** : RAG

SOFT SKILL

- Flexible - Autonomous
- Agile - Teamwork
- Rigorous – Dynamic

LANGUAGE

- English: Fluent
- French: Fluent
- Arabic: Native

Interests

- Streaming
- Sport
- Commitment and Community

Professional Experience:

Diot Sciacy Technology | 07/2025 – Now:

Software Development Engineer

- Development for the insurance sector, impacting **200K clients**.
- Performance optimization: reduction of key service latency **by 25%**.
- Deployment of an AI project for automated collection and declaration of insured values
- Implementation of performance testing (load, stress, spike)
- Implementation of CI/CD pipelines for deployment automation.

Tech Stack :Java 21, Spring Boot, Angular 19, FastAPI, PostgreSQL, K8S, GitLab CI

EASYPEASY (HORIZON GROUP) | 02/2025 – 06/2025 :

FullStack Java Engineer

- Development of an insurance management platform used by **+500 agents**.
- Microservices Architecture: contribution to the deployment of **3 new services**.
- Deployment and monitoring on AWS, ensuring service **availability of 99.9%**.
- Continuous improvement of existing services and bug fixing.
- Contribution to the deployment and monitoring of services on AWS.

Tech Stack : Java 21, Spring Boot, Microservices, PostgreSQL, AWS, CI/CD

EAMBIITION | 09/2024 – 01/2025 :

Backend Java Developer (Internship)

- Development of robust backend applications in Java.
- Design and optimization of backend architectures.
- Improvement of application performance and software quality (**+40%** via unit/integration tests).
- Integration of CI/CD pipelines for 3 to 5 daily deployments.
- Collaboration in the management of environments and deployment monitoring.

Tech Stack : Java 17, Spring Boot, PostgreSQL, Kubernetes 1.31, Jenkins, SonarQube, , ArgoCD

OFFZONE AGENCY | 02/2024 – 08/2024:

FullStack Java Developer (Internship)

- Development of a healthcare platform comprising **3 main modules**.
- Design and implementation of backend functionalities using Spring Boot.
- Front-end development in ReactJS for a fluid and accessible interface, designed for 5,000 potential users.
- Management of appointments, patient files, and secure communication between medical stakeholders.

Tech Stack : Spring Boot, MySQL, ReactJS, Docker

SMART-M | 10/2023 – 01/2024 :

Software Engineer (Freelance)

- Participation in the development of a SaaS platform for the management of **+300** online condominiums during **the first 3 months**.
- Design and implementation of backend functionalities using Spring Boot.
- Contribution to the Cloud architecture and deployments on AWS with Terraform.
- Management of the provisioning of **+10 resources** (VPC, EC2, RDS, etc.) via IaC
- Close collaboration with the team to ensure integration between the back-end and front-end.

Tech Stack : Spring Boot, ReactJS, PostgreSQL, AWS, Terraform

Education & Degrees:

State Engineer in Computer Science. National School of Applied Sciences (ENSA), Marrakech

- June - 2024

Baccalaureate in Mathematical Sciences, Option B

ERRAZI, Settat

- 2018 - 2019
